# GROUND SOURCE COLLECTOR SYSTEM

## MIBEC LTD INTRODUCTION

Mibec offers a complete range of reliable and high-quality renewable energy product solutions specifically tailored to meet the needs of our customer.

We use our specialist knowledge to offer a full range of ground source collector products from extruded straight and coiled PE100 pipe in an extensive SDR range of thicknesses, assembled loops, E/F & spigot fittings to bespoke manifolds and chambers. If you are not sure of the exact products you need for your project, our team can help you just call us on 01782 959170.

Thanks to our other specialised project related items such as pre-insulated underground district heating pipe, underfloor heating components, thermal storage buffers up to 200,000 litres, heat meters as well as glycol and plate heat exchangers that we hold in our range, we are the perfect one stop shop for all your ground source projects.

Our Mibec stock is held here in the UK enabling us to provide a fast, countrywide delivery service. We undertake project pre-planning of larger contracts enabling us to forecast our stock

holding so our customers can 'call off' the larger orders without any shortages. We can even make coiled pipe to order to specific lengths to reduce waste on site. Smaller, emergency fittings can also be sent overnight via our carrier service.

Contact us today with your requirements on 01782 959170.
